CASE - 300 SERIES

The 300 series Case was the new model designed to replace the VAC tractor. In 1956 the company used the term "stunning new style" when it was introduced.

The 1950's were a period of changes, mergers, and innovative developments for the Case Company. Noteworthy were styling features, rapid change of models, the purchase of and merger with American Tractor Corp., and change of leadership. Marc Rojzman became President, and as former head of American Tractor Corp. he brought the first crawler type tractor to Case with the TerraTrac trademark.

Case also inaugurated a new system of model identification. The first number denoted the series model; the second, engine type; and the third number, type of tread. A 300 number would identify the tractor as a 300 series with a diesel engine and standard tread. A 311 number would be a 300 series, with a (1) gas engine and (1) a row crop or general purpose design. The system was confusing in that it was not always consistent throughout the period 1953-1969.

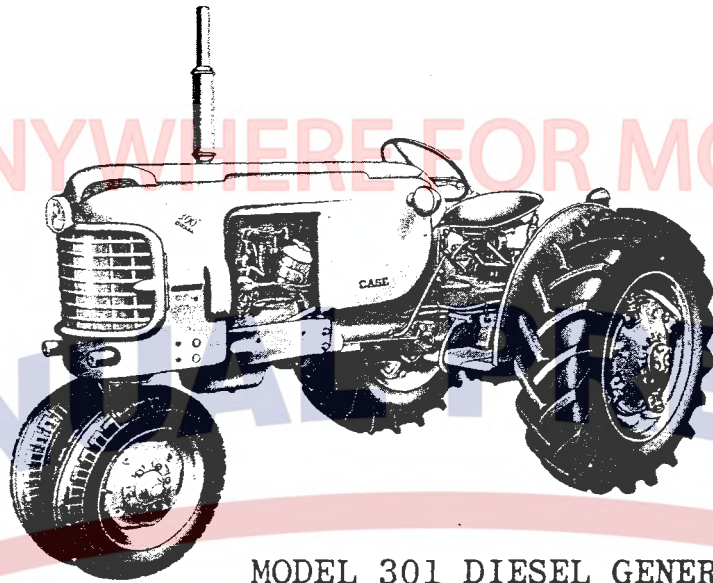

A Case 311 was tested in 1957 by Nebraska Testing Laboratory. This was a gas engine row crop model. It was a four cylinder engine rated at 1725 RPM with a 3 3/8 by 4 1/8 inch bore and stroke. It produced a drawbar pull of 23.4 HP.

The tractor weighed 3,560 lbs. and recorded 10.07 horsepower hours per gallon of gasoline. The 300 series offered a two speed transmission giving either four or twelve speeds forward.

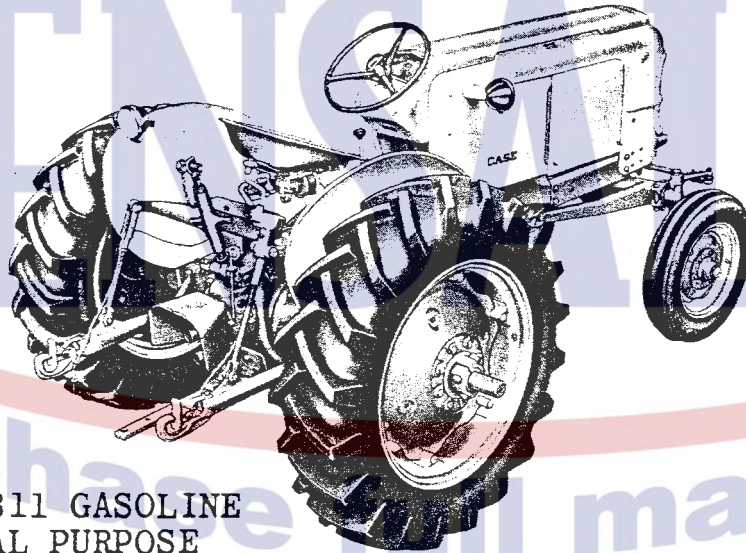

Case offered twelve new models in the 300 and 400 series during the period 1956-1957.

The diesel models came equipped with a four cylinder Continental engine. This was the first Case diesel tractor in the three plow class. Other new features were Case Hi-Compression power, torque spark ignition, power shift, rear wheel spacing, one piece instrument panel, ignition key start, speedometer and tachometer.
