A TUG BOAT ON SHORE DUTY

Spotting freight cars is one of the useful chores where "Caterpillars" save money and minutes. (1) The Ten

handles a switching job at Toledo, Ohio. (2) The Clem Gravel Co. at Dallas, Texas, pulls big gondolas to the drag-line ... an old model of the "Caterpillar" Tractor, built nearly 12 years ago.

(3) The Sixty pulls cars for the Western Bridge and Construction Co. at Hermosa, South Dakota.

**On Construction
or Maintenance**

The Sixty, with its working partner, the Russell Super-Mogul Grader, is a friend to everybody who likes a smooth, safe speedy road. Here are two pictures from Virginia... *above*, on the road to Oak Hill, and *below*, on the Rock Springs-Sutherlin Road. Notice particularly the clean job in the bottom picture.

A DEMONSTRATION..

...AND A SALE !

"Can the Thirty Hillside Special work on my hills?" asked Mr. L. J. Mowers, orchardist of Vacaville, California. "It surely can," declared Wayne Griffin, operator for the Robinson Tractor Co. So the "Caterpillar" was delivered to Mr. Mowers' 235-acre orchard... it roared up the steepest grades... clung tenaciously to hillsides so sharp that dislodged clods rolled 200 feet down to the road... kept its footing on places where no tractor had ever dared go before. "All right! I'm convinced!" declared Mr. Mowers, and then and there obligingly consented to sign the order before the camera.
