AN EXPLANATION OF SERIAL NUMBER LISTING

One serial number range is used for all 1530 Series Tractor. An individual serial number is assigned to each tractor. Serial number information given on any page is applicable only to parts listed and illustrated on that page.

When the parentheses include only the dash the part is used on all machines except as noted in the description column (-)

When a serial number appears before the dash the part was introduced beginning with that serial number and is still being used (00000-)

When a serial number appears after the dash the part was used up to and including that serial number but was not used after that serial number (-00000)

When serial numbers appear both before and after the dash the part was used beginning with the first serial number but was not used after the second serial number (00000-00000)

When a serial number contains xxxxx before the dash the part is approved for production but the beginning serial number was not established when this catalog went to press (xxxxx-)

When a serial number contains xxxxx after the dash the part is discontinued but the last serial number was not established when this catalog went to press (-xxxxxx)

EXPLANATION OF SUBSTITUTION INFORMATION

Part substitution information given on any page is applicable only to parts listed and illustrated on that page.

BOLT AND CAP SCREW STRENGTH IDENTIFICATION

Bolts and cap screws required to have high-strength qualities equivalent to SAE Grade 8 are identified throughout this catalog by the description HS SAE 8. Unless identified by this description all standard bolts and cap screws are SAE Grade 5.
